Three generations of bulls: Ranger – Woody – Perfect

BETTER COWS > BETTER LIFE

CRV, leading
in health and efficiency

OVALERT

**A fertile and
healthy herd**

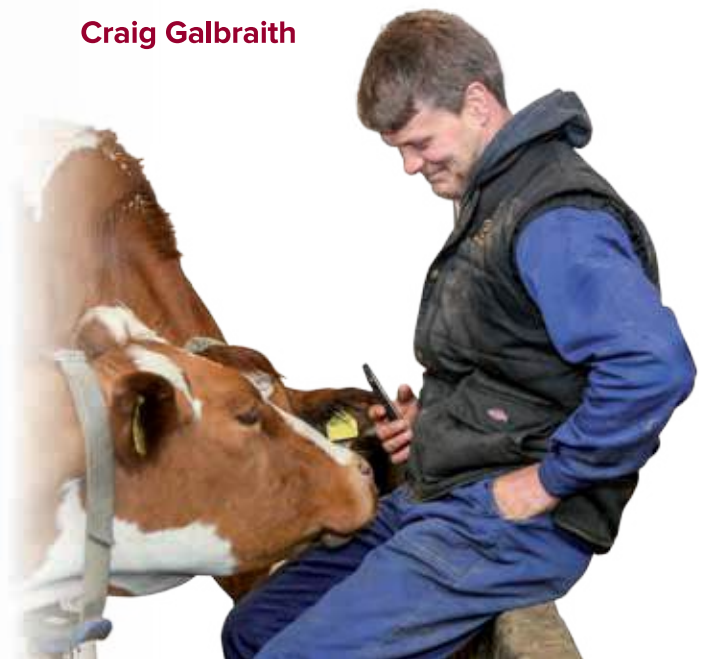

Watching your herd around the clock

The Ovalert heat detection system detects and identifies health, feed and fertility signals earlier and more effectively than the human eye and works 24 hours a day.

As a farmer, you can easily monitor the performance of the whole herd and it makes your herd more efficient and easier to manage. Hundreds of farmers are discovering the added value of Ovalert health, feed and fertility management.

***“We can now allocate our time
to cows that really need it”***

HERDOPTIMIZER

Now available
Online
application!

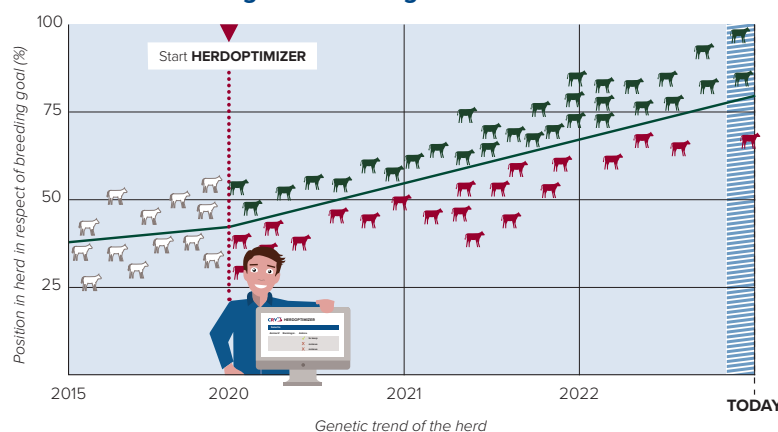

Genomic testing for the next generation herd

HerdOptimizer is a tool to gain easy insight in the genetic potential of your herd. This customized breeding concept and management tool contains female genotyping and the possibility to personalize your mating advice using SireMatch. The online application is 24/7 accessible on any mobile device.

- 24/7 access to genomic data of your animals
- Ranking on your personalized breeding objective
- Fast genetic progress through integration with SireMatch

Genomic testing for the next generation herd

BETTER COWS > BETTER LIFE

CRV offers the perfect solution for your herd. Check out CRV4all.co.uk
