Dam of Boulevard and Smash

BETTER COWS > BETTER LIFE

CRV, leading
in health and efficiency

OVALERT

**A fertile and
healthy herd**

Watching your herd around the clock

The Ovalert heat detection system detects and identifies health, feed and fertility signals earlier and more effectively than the human eye and works 24 hours a day.

As a farmer, you can easily monitor the performance of the whole herd and it makes your herd more efficient and easier to manage. Hundreds of farmers are discovering the added value of Ovalert health, feed and fertility management.

***“We can now allocate our time
to cows that really need it”***
